UniPOC System At the center of point-of-care testing

UniPOC System At the center of point-of-care testing

UniPOC[™] System is an open data-management solution that seamlessly connects and manages the largest ecosystems of point-of-care devices.

Secure connectivity to:

Over 150 POC devices
Over 30 manufacturers

- The only POC system with an automated operator validation and certification process*
- Active directory integration
- · 64-bit database and operating system compatibility

UniPOC System Benefits

Open and Scalable

- Vendor-neutral, single-enterprise system for seamless integration with multiple platforms (LIS, HIS, EMR, LMS)
- Compliance with IT infrastructure, including 64-bit software for added security and active directory integration for password management
- Full flexibility in selection of POC tests through the widest array of connected devices

Rapid Innovation

- Keeps pace with evolving POC needs through semiannual system updates
- Siemens Healthineers interface development expertise accelerates development time
- 3 to 4 new point of care device interface releases per quarter

Intelligent Operational Efficiencies

- Intelligent dashboards for informed, near real-time data-driven decision making
- Permission-based data manager with customizable scope and permission settings for user-specific access tailored to job function
- Seamless and secure integration with existing email system for efficient sharing and workflow improvement, with no additional setup required

Connectivity Expertise

- Expert knowledge in interface development since 1999
- Unique experience in uni- and bidirectional device interfacing
- Extensive integration know-how: all relevant LIS, HIS, and PDMS systems; interfaces to learning management systems

Seamless Transition:

PrecisionWeb to UniPOC System

Minimized IT and POC Time

- Virtually no transitional training one hour or less
- Seamless transfer of operator and instrument setup and configurations
- Easy migration of existing database and interfaces, eliminating the need to build a new data-management system from the ground up

POC Integration Expertise

Siemens Healthineers brings extensive experience and responsive innovation to POC:

- 16+ years of software and lab integration experience
- More than 3000 installations in 30 countries
- Open architecture and vendorindependent approach to POC

Integrate

Web Results Xpress (WRX) may be used to document information electronically for integration into the POC datamanagement system and EMR. Examples include non-instrumented tests, QC and proficiency data, procedures, and paper logs.

Inform

Quickly view result exceptions, device alarms, connectivity, and operator status with a single click for proactive resolution.
